DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. With respect to independent claims 1, 10 and 12, prior art fails to disclose method and apparatus of an electron beam exposure apparatus for controlling deflection timing of an electron beam with high precision including: blanking-electrode array having a deflecting electrode for deflecting an electron beam; a deflection timing control section for outputting the control signal for controlling the blanking-electrode array; load circuit, of which the impedance is the same as that of the blanking-electrode array, where the impedance between the deflection timing control section and the load circuit is smaller than the impedance between the deflection timing control section and the deflecting electrode of the blanking-electrode array; and switching section, connecting with the deflection timing control section, the blanking-electrode array, and the load circuit, for switching the destination of the control signal output from the deflection timing control section between the blanking-electrode array and the load circuit.

Claims 2-9 and 11 are allowed by virtue of their dependencies on the independent claims 1, 10 and 12.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Statement of Reasons for Allowance".
